Did you know...

... eastern coyotes are coyote-wolf hybrids?

Our wild canine residents have been quite active this mating season. From daytime howls to daytime prowls, they have been making their presence well known. And we have noticed quite a variety - some small, some large, some brown, some grey - possibly owing to their complex genetic history. As it turns out, Cape Cod coyotes are actually coyote-wolf hybrids, with some domestic dog genes in the mix, too!
