

Chase Garden Creek looking towards Tobey West

May 5, 2022

Updates from the DCLT

Unanimous Vote for Tobey West in Dennis!

"Tobey West" - 8.02 acres located at 272 Main Street (Route 6A) along Chase Garden Creek is of the highest environmental priority for protection within Dennis today. It is comprised of six acres of upland and more than seven acres of marsh, including State-designated priority habitat for fish, upland birds and small mammals. The land provides a buffer to the Chase Garden Creek estuary, the largest on Dennis' Northside.

Thank you for your support of Tobey West at Dennis Town Meeting this week!

Evening Social at Devil's Purse!

Did you know...

Do you know how the Shadbush got its name?

The *Amelanchier canadensis* has several common names - Shadbush, Serviceberry, and Juneberry are just three. Some say that thousands of years ago, the bush would flower when shad fish returned in rivers from Massachusetts to Connecticut in March/April. Many tales have been shared about this beautiful bush that is now in bloom.
